

LIVINGSTONE® SOLID SURFACE COLOR FASTNESS FOR EXTERIOR APPLICATIONS

The following technical bulletin is provided for use during design consideration when Livingstone materials are being considered for exterior applications. The following recommendations are provided based upon testing in accordance with ASTM Standard G155.

In general, a minimal color shift occurs with whites, light colors and earth tones and is most evident in dark colors that are heavily pigmented. Colors may be restored through either re-sanding/finishing or cleaning on a periodic basis.

The following groupings represent from least (Group A) to most (Group C) the amount of color shift that may occur during a typical ten (10) year material life cycle for exterior installations.

**GROUP A:** (Best exterior color performance with no to minimal color shift over a period of ten (10) years.)

ESCAPE SERIES	ADVENTURE SERIES	EXPLORE SERIES	DISCOVER SERIES
Bechamel	Wild Pearl	Polaris	Sand Dollar
Brisk	Pebble Beach	Ariston	Thunder Cloud
Frappe	Parchment	Opus	Shoreline
Snow White	Ice Cap	Ambrosia	Rock Salt
Dune	Sailcloth	Appalachian	Sea Pearl
Key West	Cantera	Dogwood	Avalanche
